KEY QUALIFICATIONS

- 19 years of application development and operation spanning industries, business domains and technologies.
- Technically astute: AI, API, Agile, fullstack, DevOps, SQL, Cloud, Security and Performance tuning.
- Multidisciplinary and system thinking: Project management, Risk management, Economics, Finance, and Business and Property laws.
- Pragmatic. Transparent. Taking initiatives. Taking ownership.

WORK & LEADERSHIP EXPERIENCE

BANK OF NEW YORK

Application Development Manager, Vice President

Jun 2021 – Aug 2026

- Analyze business requirements, design system architecture, build end-to-end solutions, integrate with different systems and set up continuous integration and deployment pipeline.
- Co-lead technical revamp projects, conduct as-is review, design micro-service architecture, drive reusable service and component development, and demonstrate proactive project management.
- Lead engineering excellence initiative, conduct surveys, plan activities and facilitate discussion.
- Interview, train, support and mentor junior developers.

MASTERCARD

Lead Software Engineer

Feb 2016 – Jun 2021

- Performed in various roles spanning all aspects of API development and management including technical owner, developer, consumer, auditor and platform provider.
- Led feature development across technology stacks, teams and time zones. Design and implement microservices.
- Advocated DevOps practices. Led by examples. Trained, supported and mentored junior developers.
- Innovated, executed and developed technologies within Mastercard's Products & Innovation: Open Banking API, Unattended retails, F&B order and payment, POS integration, payment gateway integration, card-on-file, loyalty and credit-based marketing.
- Led Unattended Retails (Vending) pilots in Singapore. Was instrumental in adapting the solution to Japan market.

SINGTEL

Solution Designer

Jul 2014 – Feb 2016

- Owned the technical side of several core business support systems (loyalty management, contact case management, knowledge management, operation support systems, network supports). Interacted with interfacing systems across boards, often with complex dependencies and varied requirements.
- Gathered and validated business requirements and developed E2E solution designs. Provided consultation and conducted ideation sessions.

- Interacted and influenced business clients and technical peers in sales, marketing, operations, finance, network and supporting functions (service management, vendors, release management, infrastructure)
- Reviewed and negotiated vendors' technical design and quotations.

ROTARY ENGINEERING

Senior System Analyst

Mar 2014 – Jul 2014

- Led IT and digitalization projects to improve operation and planning.
- Left due to long commute and family reasons.

GIC

IT Analyst

Jan 2013 – Mar 2014

- Supported and enhanced a high-availability, low-latency business-critical system and its interfacing systems (equity, derivatives trade desks, security databases, reporting, corporate actions...).
- Attained good understanding of business logic, operation, governance and regulatory requirements after 3 months of joining.

SINGTEL

Jul 2007 – Jan 2013

System Analyst

- Developed and supported a comprehensive suite of sales, order, job, and vendor management applications for Globe Telecom (Philippines). Worked with clients and colleagues in Singapore, Philippines and China.
- Met or exceeded expectations in all assignments. Attained tech lead position after 2 years of joining as fresh graduate.
- Pioneered new technologies (web service, portal, jQuery, Ajax, Spring, Struts). First in team to pay due attention to system security and automated testing.
- Took ownership and initiative in writing framework documentation, development guides and maintaining a knowledge wiki.

EDUCATION & SKILLS

National University of Singapore

- Master of Computing in Computer Science **Jun 2013**
- Bachelor of Computing (Honour) in Computer Science **Jun 2007**

Professional Certificates

- Azure AI Engineer Associate, AWS Solution Architect Associate, Azure Developer Associate, Certified Kubernetes Application Developer, Java, C#, JavaScript, Snowflake
- PMP, ITILv3 Foundation

Other Skills

- Python, React, Angular, Hugo, shell, Cloudflare, ffmpeg, NoSQL
- Vibe Engineering, Prompt Engineering, Technical writing

Extra....

Professional Skills

- AI Engineering
- Cloud-based development: Azure, AWS
- Full stack development: ReactJS, Angular, JavaScript, Spring framework, popular DBMS, data engineering, vulnerability management
- Distributed architecture: microservices, event-driven architecture
- Cloud and containerization: Docker, Kubernetes
