

NGUYEN THE HUY

Software Engineering Manager | Application Development Leader | Cloud, API & Modernization

(+65) 9236-1574 | ngthehuy@gmail.com | Singaporean

<https://www.linkedin.com/in/nthehuy> | <https://github.com/geraldnguyen>

KEY QUALIFICATIONS

- Software engineering leader with 19 years of experience leading application development, modernization, and production delivery across banking, payments, telecommunications, and engineering domains.
- Proven track record in managing end-to-end software delivery, driving architecture evolution, improving engineering quality, and aligning cross-functional stakeholders across business and technology teams.
- Strong technical foundation in cloud, APIs, microservices, full-stack development, DevOps, data platforms, security, and AI-assisted engineering practices.

WORK & LEADERSHIP EXPERIENCE

BANK OF NEW YORK

Application Development Manager, Vice President

Jun 2021 – Aug 2026

- Led a team of 5–10 engineers delivering end-to-end application development across requirements analysis, solution architecture, engineering delivery, systems integration, and CI/CD enablement.
- Owned a business-critical reporting platform serving Asset Servicing, Markets, Treasury, Finance, and Payments across APAC, including regulatory reporting requirements.
- Co-led three major modernization initiatives: monolithic to microservices architecture, Java-based ETL to Apache Spark and Airflow, and MSSQL to Oracle migration.
- Increased release cadence to bi-weekly, enabled independent deployments, and eliminated wasteful packaging by 25% through improved engineering and release practices.
- Raised automated test coverage from 60% to over 80% and expanded PR code quality automation from around 30% to 100%.
- Interviewed, trained, supported, and mentored junior developers while partnering with business and technology stakeholders to align priorities and execution.

MASTERCARD

Lead Software Engineer

Feb 2016 – Jun 2021

- Served as Lead Engineer, leading a team of 3–4 engineers and mentoring junior developers while driving technical direction, delivery, and engineering standards.
- Led the internet-facing developer portal and 3–4 internal supporting services, helping double the number of APIs and services onboarded to the platform between 2018 and 2020.
- Led cross-functional delivery of F&B ordering and payment mobile applications and supporting services, including 3 POS integrations, 2 payment gateway integrations, loyalty management, and payment service APIs supporting Singapore, Brazil, Europe, and Australia.
- Served in technical leadership roles across the API lifecycle, including platform provider, technical owner, developer, consumer, and auditor, with broad exposure to engineering, governance, and delivery perspectives.
- Championed DevOps practices, led by example in engineering discipline, and designed microservices-based solutions across multiple technology stacks, teams, and time zones.
- Led unattended retail pilots in Singapore and played a key role in adapting and extending the solution for the Japan market.

SINGTEL

Solution Designer

Jul 2014 – Feb 2016

- Owned the technical direction of core business support systems spanning loyalty, case management, knowledge management, operations support, and network support across complex dependencies and interfacing platforms.
- Gathered and validated business requirements, developed end-to-end solution designs, and facilitated consultation and ideation sessions with cross-functional stakeholders.
- Influenced business, technical, and vendor stakeholders to align solution delivery with business and technical objectives.

ROTARY ENGINEERING

Senior System Analyst

Mar 2014 – Jul 2014

- Led IT and digitalization initiatives to improve operational efficiency, planning effectiveness, and technology enablement.

GIC

IT Analyst

Jan 2013 – Mar 2014

- Supported and enhanced high-availability, low-latency investment systems across equities, derivatives, security databases, reporting, and corporate actions, while rapidly building domain knowledge in business processes, governance, and regulatory requirements.

SINGTEL

Jul 2007 – Jan 2013

System Analyst

- Developed and supported a suite of sales, order, job, and vendor management applications for Globe Telecom (Philippines), collaborating with clients and teams across Singapore, the Philippines, and China.
- Progressed to a tech lead role within two years, reflecting strong delivery ownership and leadership potential.
- Introduced new technologies and practices, including web services, portals, Spring, Struts, security improvements, automated testing, and technical documentation standards.

EDUCATION & SKILLS

National University of Singapore

- | | |
|--|-----------------|
| • Master of Computing in Computer Science | Jun 2013 |
| • Bachelor of Computing (Honour) in Computer Science | Jun 2007 |

Professional Certificates

- Azure AI Engineer Associate | AWS Solutions Architect Associate | Azure Developer Associate | Certified Kubernetes Application Developer
- PMP | ITIL v3 Foundation
- Core technologies: Java, C#, JavaScript, Snowflake

Other Skills

- Additional technologies: Python, React, Angular, Shell, Hugo, Cloudflare, FFmpeg, NoSQL
- Additional strengths: AI-assisted software development, Prompt Engineering, Technical Writing
