

NGUYEN THE HUY

Software Engineering Leader | Technical Strategy & Architecture | Fullstack Development

(+65) 9236-1574 | ngthehuy@gmail.com | Singaporean

<https://www.linkedin.com/in/nthehuy> | <https://github.com/geraldnguyen>

KEY QUALIFICATIONS

- Engineering leader with 19 years of experience driving technical strategy, architecture, and delivery across banking, payments, telecommunications, and engineering domains.
- Proven in scaling teams, modernizing platforms, leading SDLC, and improving quality through CI/CD, observability, automated testing, vendor governance, and stakeholder management.

WORK & LEADERSHIP EXPERIENCE

BANK OF NEW YORK

Application Development Manager, Vice President

Jun 2021 – Aug 2026

- Led 10 engineers across SDLC, solution architecture, delivery, systems integration, CI/CD, and production support for a business-critical APAC reporting platform.
- Owned roadmap serving Asset Servicing, Markets, Treasury, Finance, Payments, and regulatory reporting across APAC.
- Drove modernization from monolith to microservices, Java ETL to Spark/Airflow, and MSSQL to Oracle.
- Improved release cadence to bi-weekly, enabled independent deployments, cut wasteful packaging by 25%, raised test coverage from 60% to 80%+, and expanded PR quality automation to 100%.
- Managed contractor/vendor team lifecycle: interviews, delivery oversight, performance reviews, offboarding, hiring coordination, and resource planning with vendor account managers.
- Rebalanced vendor capacity across developer, BA, and QA needs, increasing concurrent analysis/design throughput from 1 in 5 epics to 3 in 5.
- Cut contractor onboarding/setup time by 40%+ through structured documentation and buddy pairing.
- Delivered Citibank chatbot integration, coordinating technical design, dependencies, and stakeholder alignment across banking and partner teams.
- Served as senior technical interface for Finance Controllers, Markets, Risk, Treasury, CAB, APAC Engineering Leadership, and Foundational Data leaders across China, Hong Kong, Singapore, Taiwan, Korea, and Japan.

MASTERCARD

Lead Software Engineer

Feb 2016 – Jun 2021

- Led 3–4 engineers, mentoring developers and driving technical direction, delivery, and engineering standards.
- Led the internet-facing developer portal and 3–4 internal platform services, helping double the number of APIs and services onboarded between 2018 and 2020.
- Led customer-facing F&B ordering/payment apps and services across Singapore, Brazil, Europe, and Australia, including POS, payment gateway, loyalty, and payment API integrations.
- Championed DevOps, CI/CD, observability, and automated testing practices while designing microservices-based solutions across multiple technology stacks, teams, and time zones.
- Served in technical leadership roles across the API lifecycle, including platform provider, technical owner, developer, consumer, and auditor, with broad exposure to engineering, governance, and delivery perspectives.
- Led integrations with Wirecard, Oracle Micros, Eunoia POS, SPH Buzz, and Auresys, enabling unattended retail pilots in Singapore, Dublin, and Japan.

SINGTEL

Solution Designer

Jul 2014 – Feb 2016

- Owned solution direction for loyalty, case management, knowledge management, operations support, and network support systems.
- Partnered with Sales, Marketing, Customer Service, technology, and operations stakeholders to validate requirements and balance roadmap, architecture, budget, resource, and delivery trade-offs.
- Reviewed SOW and contributed to SLA, deliverable, scope, and vendor alignment discussions for chat integration.

EARLIER EXPERIENCE

- **Rotary Engineering — Senior System Analyst | Mar 2014 – Jul 2014:** Led IT and digitalization initiatives across job management, planning, reporting, and operational systems to improve efficiency and technology enablement.
- **GIC — IT Analyst | Jan 2013 – Mar 2014:** Supported high-availability, low-latency investment systems across equities, derivatives, security databases, reporting, and corporate actions, building domain knowledge in governance and regulatory requirements.
- **Singtel — System Analyst | Jul 2007 – Jan 2013:** Developed and supported sales, order, job, and vendor management applications for Globe Telecom, collaborating with clients and teams across Singapore, the Philippines, and China. Progressed to tech lead within two years and introduced web services, portals, Spring, Struts, security improvements, automated testing, and documentation standards.

EDUCATION, CERTIFICATIONS & SKILLS

- Master of Computing in Computer Science, National University of Singapore | Jun 2013
- Bachelor of Computing (Honours) in Computer Science, National University of Singapore | Jun 2007
- **Certifications:** Azure AI Engineer Associate, AWS Solutions Architect Associate, Azure Developer Associate, Certified Kubernetes Application Developer, PMP, ITIL v3 Foundation
- **Core stack:** Java, React, Next.js, AWS, PostgreSQL, SQL, Microservices, CI/CD, Observability, Automated Testing
- **Leadership:** Technical Strategy, Architecture, SDLC, Agile/Scrum, Vendor Governance, Stakeholder Management, Partner Integration, AI-assisted development
